

**SPECIALIST FAMILY LAW
BUSINESS VALUATIONS**

Timely, fixed-fee, business valuations by family law experts

Often, when working through a divorce or separation, the need for business valuations to be prepared can create a range of issues and delays.

The complexity of these types of valuations often means the cost to prepare is inflated, the process is long and drawn out, and, worst of all, the final report lacks sufficient detail and ends up being contested by the other party.

As a practice specialising in business valuations for family law matters, we'll help you avoid these problems, for a fixed fee that is typically much lower than other providers.

Our process is designed specifically for family law business valuations and includes:

- A comprehensive analysis of the business's performance
- Detailed review of the last three years financial statements
- Comparative data comparing the business with similar businesses
- A detailed business valuation report accompanied by full financial calculations and reasonings to support the valuation.

Free initial discussion with you and/or your lawyer
that allows us to understand your specific needs and the complexity of the valuation required.

Timely and efficient process
because time is of the essence in family law matters, we can accommodate short turn-around times.

Simple, step-by-step process
with clear info and communication – so you know what to expect, what is required, and when.

Specialists in family law business valuations
using proprietary tools, software and data to deliver accurate and detailed valuations.

Fixed-fee upfront quote
so you know exactly what the exercise will cost – before it gets underway.

Ongoing support – including court appearances
we're happy and available to explain and support our findings, including appearing in court if required.
